

Dr. Hanan Saleet

Associate Professor at the Mechanical and Industrial Engineering department-Applied Science Private

Dr. Hanan Saleet is an Associate Professor at the Mechanical and Industrial Engineering Department-Applied Science Private University (ASPU). She completed the PhD degree in Systems Design Engineering from the University of Waterloo- Canada in 2010; after which She was a Post-Doctoral Fellow for nearly one year. She joined the Mechanical and Industrial Engineering department as a faculty member in September 2011 where she serves as in many Committees. She served as the head of the department for nearly two years. She was awarded the scientific research award for the year 2018. She is currently the ABET committee leader for the department of the Mechanical and Industrial Engineering. She is affiliated with the Jordan Engineers Association and affiliated with the Institute of Industrial and Systems Engineering (IISE), she is now the advisor for the IISE ASPU student chapter. Dr. Hanan Saleet served as a member of the preparation committee for the second “International Conference on Industrial, Systems, and Manufacturing Engineering, “ISME'2” which was held in November 2019. She cooperates with many manufacturing and service companies to improve their productivity utilizing data sciences such as King Hussein Cancer Centre, Queen Alia International Airport, NutriDar, Hikma Pharmaceutical, Swiss kitchen, etc. She has published in many referred journals; she is a reviewer for many journals and conferences. Her current research interests are: Data sciences and analytics applications in industrial engineering, intelligent supply chain management, systems design, modeling and optimization, and continuous process improvement. In these areas she has many refereed journal and conference publications
