Directorate of General Security – Internship at **The University of Jordan** which held an intensive **30-hour course** deals with music, music therapy, drama therapy, and visual arts therapy started on October **3th** and ended on October **9th**.

This treatment is a new, innovative, and highly effective treatment that is similar to psychological and chemical therapy, and in some cases that have been treated, art therapy has made a lot of progress in addition to its being highly treatable in some cases more than chemo via medications and painkillers, according to a number of patients who have tried both treatments.

We are proud of this collaboration and this harmony in a high-level performance.
