- **Event Description:**
- **Title: Workshop on "Entrepreneurship for Educational Technology Specialists:**

The Faculty of Education at Suez Canal University recently held a workshop titled "Entrepreneurship for Educational Technology Specialists," supervised by Dr. Nihal Lotfy, Lecturer in Educational Psychology and European Union Project Coordinator, and Dr. Basem Abdelghany, Lecturer in Educational Technology and Artificial Intelligence Specialist. The workshop was part of the ICT4EDU project's training activities aimed at advancing knowledge in educational technology and entrepreneurship.

The workshop addressed various important topics, including the fundamentals of educational technology and the tools used to enhance teaching and learning. Key discussions also explored the role of artificial intelligence in education and how educational game motivators can enhance student engagement. Participants were introduced to emerging technologies like virtual and augmented reality, which have the potential to revolutionize learning experiences. Additionally, the importance of e-

learning environments and learning management systems (LMS) was emphasized as essential for modern educational settings.

A significant focus of the workshop was on entrepreneurship opportunities for educational technology specialists, highlighting how specialists can contribute to the rapidly growing field. The event also shed light on prominent companies in the region, such as Nahdet Misr and Selah El-Telmeez, that actively seek skilled educational technology experts. Overall, the workshop provided participants with valuable insights into both the technological and entrepreneurial aspects of their field.

**Objective:**

- enhance participants' understanding of educational technology and its tools.
- explore the role of artificial intelligence in modern education.
- introduce educational game motivators, virtual and augmented reality, and their applications in teaching.
- familiarize participants with e-learning environments and learning management systems (LMS).
- provide insights into entrepreneurship opportunities for educational technology specialists.
- highlight key companies in Egypt and the Arab world that require expertise in educational technology.
